First and last name	Kamil Kaźmierski
Academic title and position	Dr hab., prof. UAM
Faculty, Institute, Department/Unit	Faculty of English, Experimental Phonology and Phonetics Laboratory
Scientific discipline	Linguistics
Research areas	phonetic variation, acoustic phonetics, corpus phonetics, phonation, sociophonetics, accents
Description of scientific activity	My research interests revolve around using quantitative phonetic data for investigating phonological and sociolinguistic patterns. I am interested in how the variation found in speech (including accents of English and Polish) is linked to cognitive categories. In my research, I employ modern digital tools for both data processing (including Python based tools for Automatic Speech Recognition, force-alignment, and, recently, voice cloning) and data analysis (the R statistical environment). I have been involved in research on phonation, Second (and Third) Language Acquisition, and Evolutionary Linguistics. I mostly work with acoustic phonetic data, but I have also worked with speech perception data, psycholinguistic data, and more.
